Four ERPs, One Platform

A global manufacturer consolidates four ERP estates onto Dynamics 365 Finance & Supply Chain.

11 → 4	4 → 1	-23%	9 mo
Days to close	ERP platforms	Run cost	Rollout duration

Context

Four regional ERP platforms, twelve interfaces, and a month-end close that consumed eleven working days. Group finance could not report a consolidated margin without three weeks of manual reconciliation.

Approach

- Fit-to-standard design with a group template and country layers.
- Master data remediation as a funded workstream from week one.
- Three full-volume migration rehearsals before first go-live.
- Wave rollout by region with a repeatable cutover runbook.

Outcome

Measure	Before	After
Month-end close	11 days	4 days
ERP platforms	4	1
Integration points	12	5
Annual run cost	Baseline	-23%

“The template held. Each subsequent region went live faster than the last, with no bespoke finance code.”
